INDUSTRIAL PROJECTS

Connaizen Merchant Portal | AngularJS, JavaScript, JQuery, Highcharts.js, Bootstrap, Less
Connaizen merchant portal is platform for merchants to target their customers using multiple bank channels. Here merchants can target their customers according to their requirement. For example (a particular merchant wants to target only Delhi-NCR region who are only using HDFC or ICICI card). Merchants can track their insights and campaign performance along with the industry's average performance, thus comparing with their own Customer Base, Transactions, Sales and Avg Ticket Size. Worked completely on this project in terms of design, ui, ux and development.
